

The Lawrence School, Sanawar

School Outreach Programme

Members of the School Health Club visited the Army Research and Referral Hospital in Delhi during the Founder break.

They interacted with the patients of the Pediatric Oncology ward in their play room and sang and danced with them. They also made them play some games and gave away something to all present there and later to those in the wards.

At the end of this short yet satisfying interaction they handed over two televisions and four carom boards to the Doctor in charge of the ward, for recreation of the patients.
